Q1. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal. Please note if the Proposal will facilitate or support the participation of DAC's in the IRWM planning effort.

The Regional Water Authority's (RWA) American River Basin Integrated Regional Water Management Plan (ARB IRWMP), adopted in May 2006, will be updated to make it fully-compliant with revised IRWM Guidelines released by DWR in July 2010. This comprehensive update will include the following elements: 1) Updating all basic water-related and demographic data; 2) considering other issues, such as California Water Plan Resources Management Strategies; 3) addressing climate change by examining the vulnerabilities of the water supply system and environment under future climate conditions using an integrated regional hydrologic model and climate assumptions based on a DWR CALSIM climate change simulation scenario; 4) identifying and proposing solutions to issues associated with a reliable and safe water supply for disadvantaged communities; 5) continuing extensive stakeholder outreach to develop objectives with metrics; 6) developing an innovative web-based IRWMP project interface and database to ensure a transparent IRWM planning effort to all stakeholders and to encourage innovation and coordination in proposing current and future projects. Using the web-based interface, we will be able to update all information on the approximately 180 projects currently identified in the IRWMP and add a minimum of 100 additional projects during the update effort. The interface will also allow RWA to evaluate, prioritize, and track implementation of projects in the IRWMP database. All work on the update will take place within the governance framework proposed in the approved Regional Acceptance Process application to ensure an open and collaborative process to identify and meet the water-related needs of the region.
